Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to the Application filed August 29, 2001.

Claims 1-59 have been examined in this case.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Black (US 6,307,956B1).
6. Black discloses an identity verification system, method, and apparatus that employ biometric technology for identity verification (e.g. col 4 ln 18-28). The biometric properties employed include, but are not limited to DNA (e.g. col 4 ln 30-40). Said system, method and apparatus make a "match" or "no match" decision and issues and certify or do not certify the user. (e.g. col 4 ln 55-65). Further, Black discloses recording

and storing the layout information as either digital or magnetic information (e.g. col 4 ln 20-30). Further, Black discloses the use of cell capture/analysis sensors for use in identifying DNA (e.g. col 7 ln 50-60).

7. Although Black does not specifically reference recording the DNA layout information by arranging probe layouts in row and column directions, it would be obvious to one of ordinary skill in the art that array of immobilized single-stranded DNA (ssDNA) could be arrayed as rows and columns or any other logical manner (e.g. col 25 ln 25-35).

8. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Selinfreund (US 6,458,595) discloses automatic fingerprint methods and chemistry for product authentication and monitoring.

11. Black (US 6,539,101) discloses a method for identity verification.
